

Efficient Payroll Accounting with NetPay Compass

All payroll costs and liabilities at a glance

The challenge:

Many companies face the challenge that DATEV provides only limited reports and data exports when it comes to their payroll solutions.

Detailed evidence and explanations must be manually compiled from multiple sources, and time-consuming and critical checks are carried out using PDF documents or risky spot checks. This makes it difficult to accurately assess the correctness of the provided data.

This is where BDO's digital Gross-to-Net solution NetPay Compass comes into play:

NetPay Compass offers a comprehensive overview of all payroll components per month, whether it's a cost-effective salary component, deduction or liability.

As a result, you can see your total aggregated monthly payroll costs, including all additional employer contributions per employee and for each salary component. Instantly see the deductions and payments they lead to.

Use our standardized NetPay Compass to reduce time and effort required for the tedious manual creation of analysis, controlling reports, payment lists, and more.

Data structure and format can be adapted to your requirements within the scope of a project.

Features and advantages:

- ▶ All payroll costs and resulting liabilities summarized in one table
- ▶ Basis for controlling reports, analysis, and payment lists
- ▶ Usable with all DATEV LODAS payslips, including trial payslips
- ▶ Available before the month-end closing
- ▶ Optional: Corrections for previous months displayed separately
- ▶ Available in either German or English

NetPay Compass is a digital product from BDO's Tax & Legal Technology division and, together with **VarianceTracker**, serves as a valuable review and quality assurance tool for payroll accounting with LODAS.
